GREEN
is all we do.

Full Product Catalog

fōlia™

The patented **Folia™** line was designed to completely redefine the take-out and leftover experience. Innovative features include tear-away flaps for easier access to food, leak resistant side flaps that prevent spills and hold condiments and cutlery, and a full array of sizes that satisfy a broad range of needs.

Folia Take-Out/To-Go Containers

ITEM#	SIZE	CAPACITY	DIMENSIONS	QTY.
EP-FSC12	I	12 oz.	5.25 x 3.6 x 2 in.	400/cs
EP-FSC22	II	22 oz.	6 x 5.4 x 2 in.	300/cs
EP-FSC35	III	35 oz.	6.9 x 5.8 x 2.5 in.	300/cs
EP-FSC58	IV	58 oz.	8.25 x 7.5 x 2.5 in.	150/cs
EP-FSC53	V	53 oz. (2-Compt.)	8.25 x 7.5 x 2.5 in.	150/cs
EP-FSC84	VI	84 oz.	9 x 7.5 x 3.5 in.	150/cs

Features vary by size.

* Compostable in commercial facilities only, which may not exist in all areas. Not suitable for backyard composting.

- I EP-FSC12**
- 12 oz. capacity
 - 5.25 x 3.6 x 2 in.
 - Easy open pull tab
 - Nests securely inside the **III**, and also fits within the **V** and the **VI**

- II EP-FSC22**
- 22 oz. capacity
 - 6 x 5.4 x 2 in.
 - Spill-resistant corner flaps

- III EP-FSC35**
- 35 oz. capacity
 - 6.9 x 5.8 x 2.5 in.
 - Molded to securely hold the **I**

- IV EP-FSC58**
- 58 oz. capacity
 - 8.25 x 7.5 x 2.5 in.
 - Condiment nook
 - Cutlery caddy
 - Large enough to hold the **I** within

- V EP-FSC53**
- 53 oz. capacity
 - 8.25 x 7.5 x 2.5 in.
 - 2 Compartments
 - Condiment nook
 - Cutlery caddy

- VI EP-FSC84**
- 84 oz. capacity
 - 9 x 7.5 x 3.5 in.
 - Condiment nook
 - Cutlery caddy
 - Large enough to hold the **I** within

New from Eco-Products®

Our newest plates, bowls & clamshells are made from durable, lightweight, and compostable wheat straw—a byproduct leftover from harvesting wheat. Check them out on page 28.

Sure we can set you up with cups, cutlery, containers and more. But we can also help you expand your brand, communicate with your customers, and meet your sustainability goals.

Communication Support

Our in-house design team can pull from our extensive library of templates, product images and graphics to create custom signage and marketing collateral specifically tailored to your business, product offering and audience.

Have your own designer? We're happy to share whatever design elements they need.

Waste Diversion Consulting

Let Eco-Products help you find creative ways to make your business or event more sustainable. Our team is armed with tips, tricks, and suggestions for you to not only minimize waste, but help you divert as much as possible. Combining our products with smart recycling and composting practices is the first step toward waste diversion success.

Customized Carbon Footprinting

Want to know the carbon footprint of your Eco-Products? Now you can explore the unique environmental footprint of your specific product selection through our Carbon Footprinting Program. A simple short report outlines the carbon, energy, and life cycle data for the products you use. Help your environmental program improve, track your numbers, and show your customers your commitment to sustainability with a Customized Carbon Footprint report. Learn more about our Carbon Footprint at ecoproducts.com/impact_assessment.html

See p. 32

Closed Loop Recycling

Introducing the Eco-Products® Closed Loop Recycling Program! This is a cutting-edge opportunity to recapture and repurpose products instead of simply tossing them.

Now you can buy recycled content plastic products from Eco-Products and turn them back into new products once again. Plastic products can be recycled several times, saving irreplaceable resources each time. We call this “closing the loop” because resources are repurposed into new materials without the dead end of the landfill.

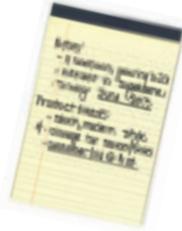

How it works If you have a lot of BlueStripe items on your hands and aren't able to recycle them, simply reach out to Eco-Products. You might have a great opportunity to close the loop on our plastic BlueStripe products.

Call us at 303-449-1876 or email our Director of Product Creation, Steve Rosse, at srosse@ecoproducts.com

Custom Shapes can fulfill your custom packaging and branding needs in ways that stock items just can't. Our experienced design team can help you create a tailor-made product to serve your food with flair. The chart below shows the typical workflow.

Let's Talk

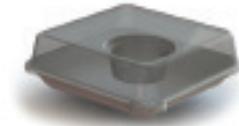

We will meet with you and better understand your goals and discover how we can develop a custom product that meets your business needs.

Let's Collaborate

A designer will hand draw some possible solutions, get your input and revise as necessary.

Let's See

Working off the sketches, our designer will create a dimensionally accurate digital model.

Let's Get Real

Using the computer renderings, we'll create a physical model using rapid prototyping technology to provide a real-life example of shape, size and user experience.

Let's Give it a Go

Once the initial design is perfected, we'll create functional samples of your product out of the actual materials. At this stage we'll test for things like strength, lid-fit and leak resistance.

Let's Wow 'Em

Once approved, we will begin production and deliver a custom package that helps you build your brand and satisfy your customers.

* Please note that custom shape orders may have minimum volume requirements.

This drop-off catering solution was designed to keep six grilled sandwiches crispy on their way to the customer.

This long, shallow container transports take-out orders of gourmet pancakes.

This clamshell for bike racing shoes serves two purposes. Before the race it's a shoebox, after the race it's a tray to tote your beer and fries.

Talk to your sales rep or email our Product Development Team at ProductDev@ecoproducts.com to get started!

Custom Prints are a great way for you to promote your organization, brand or event while also encouraging waste diversion, sustainability, and smart purchasing.

What you need to know:

Made from renewable plant materials that can be grown again and again.

Not made from oil like traditional plastics.

All GreenStripe® products (except Plant Starch Cutlery) are compostable, which means they can be returned to the soil to help plants grow.

Paper and Sugarcane products can go in the freezer, although they are not airtight, so freshness and freezer burn can become issues if left there for too long. Ingeo™ can become brittle when frozen, so we don't recommend putting these products in the freezer.

Compostable GreenStripe® products are ASTM compliant and BPI certified compostable in commercial facilities only, which may not exist in your area.

Not suitable for backyard composting. These products need the high heat of a commercial pile to break down.

RENEWABLE
RESOURCES

GreenStripe® your line of choice? Look for products marked with this icon throughout this catalog and at ecoproducts.com

right products for me?

To simplify things, we've color coded our product lines. GreenStripe® products are made from renewable resources, while BlueStripe™ products are made from post-consumer recycled content.

What you need to know:

Made from post-consumer recycled materials that have been used, recycled, and repurposed, meaning fewer virgin resources are required and less landfill waste is created.

Making new products from recycled materials helps drive recycling markets and infrastructure.

Plastic can become brittle when frozen, so we don't recommend putting these products in the freezer.

BlueStripe™ plastic products can't be recycled in most communities, but check with yours to find out what they'll accept.

BlueStripe™ products incorporate the highest amount of post-consumer recycled material available without compromising performance.

BlueStripe™ hot cups are not recyclable.

* Compostable in commercial facilities only, which may not exist in all areas. Not suitable for backyard composting.

Renewable & Compostable Sugarcane Clamshells

are grease and cut resistant alternatives to traditional petroleum-derived foam. Our **Soak-Proof Clamshells** are lined with PLA, a plant-based plastic, so they're perfect for saucier foods. We specially designed our **Flatbread Clamshells** with ridges in the bottom to elevate the pizza and keep the flatbread crust crisp in transit. Made from reclaimed and rapidly renewable sugarcane fibers. These containers are 100% renewable, BPI certified compostable and ASTM D6868 compliant.

The Eco-Products Impact Assessment

You know the saying, “You can’t manage what you don’t measure”? That’s why we invest significant resources in measuring the impacts not only of our operations, but of our products as well, across their entire lifecycle. While we might have a sense of where our impacts lie, we don’t want to make any assumptions.

If you take a look at the graph to the right you’ll probably notice that the impacts of our operations are significantly smaller than the impacts of our products. That is what happens when a company of about 50 people is managing the leading U.S. brand of environmentally preferable foodservice packaging!

Of course, it is easier to manage the environmental and social responsibility issues of your own company than those of your manufacturers or the entities that handle your products at end-of-life. It is also crucial to our brand that we walk the talk and create a corporate culture that is mindful of these issues. However, if our sustainability efforts were confined to our four walls, we would not be assuming responsibility for the largest component of our impacts – our products.

That is why in our Sustainability Report we discuss how we are trying to have a positive impact not only directly, but also indirectly throughout our value chain. The issues outside of our direct control are more challenging to address, but we are committed to making a meaningful effort to advance sustainability in every aspect of our business.

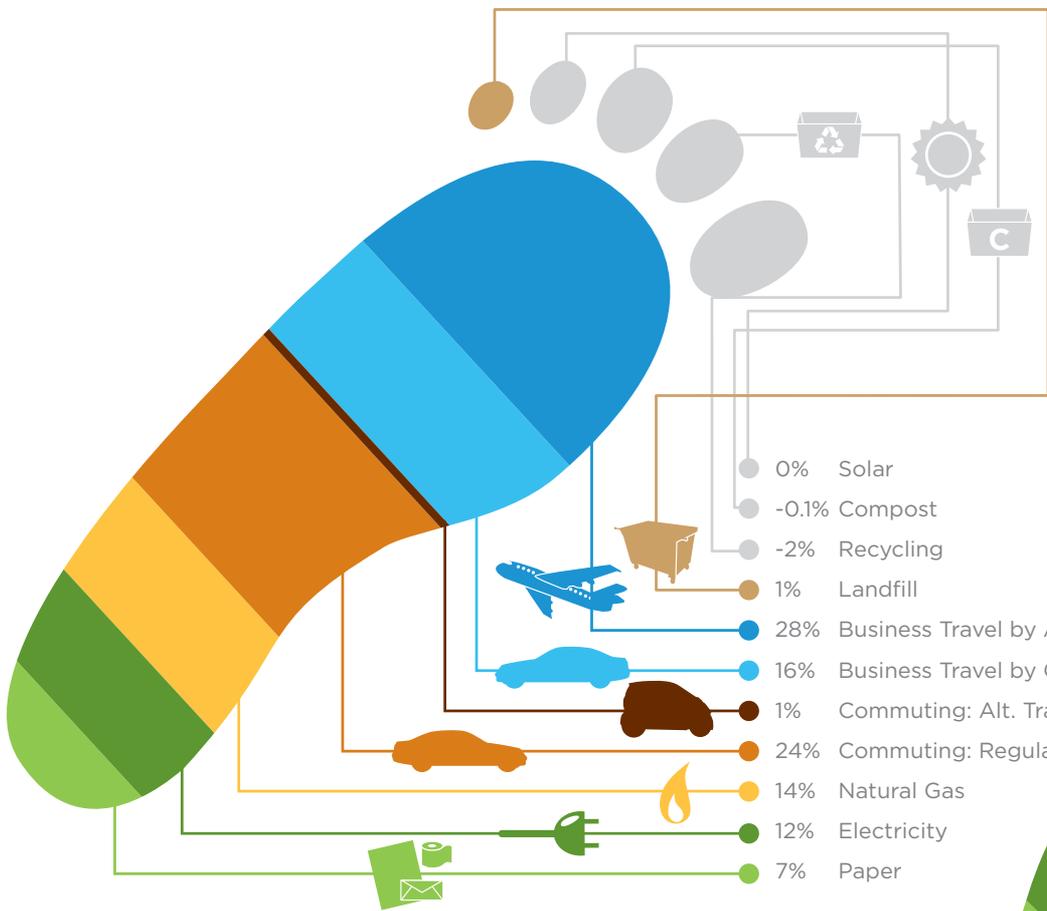

Note that our product emissions data includes lifecycle emissions from products received in our warehouses in a given calendar year. For 2014 we did not include other branded products we sell through our channels, Bridge-Gate products, and a handful of products whose materials are not included in our model, such as wheat straw. Also, due to software limitations, we had to remove our Vine, Zilchables, Cascadia, Regalia, Dahlia, and a few special project products. Approximately 75% of all cases received in our warehouses in 2014 were included in our 2014 calculation.

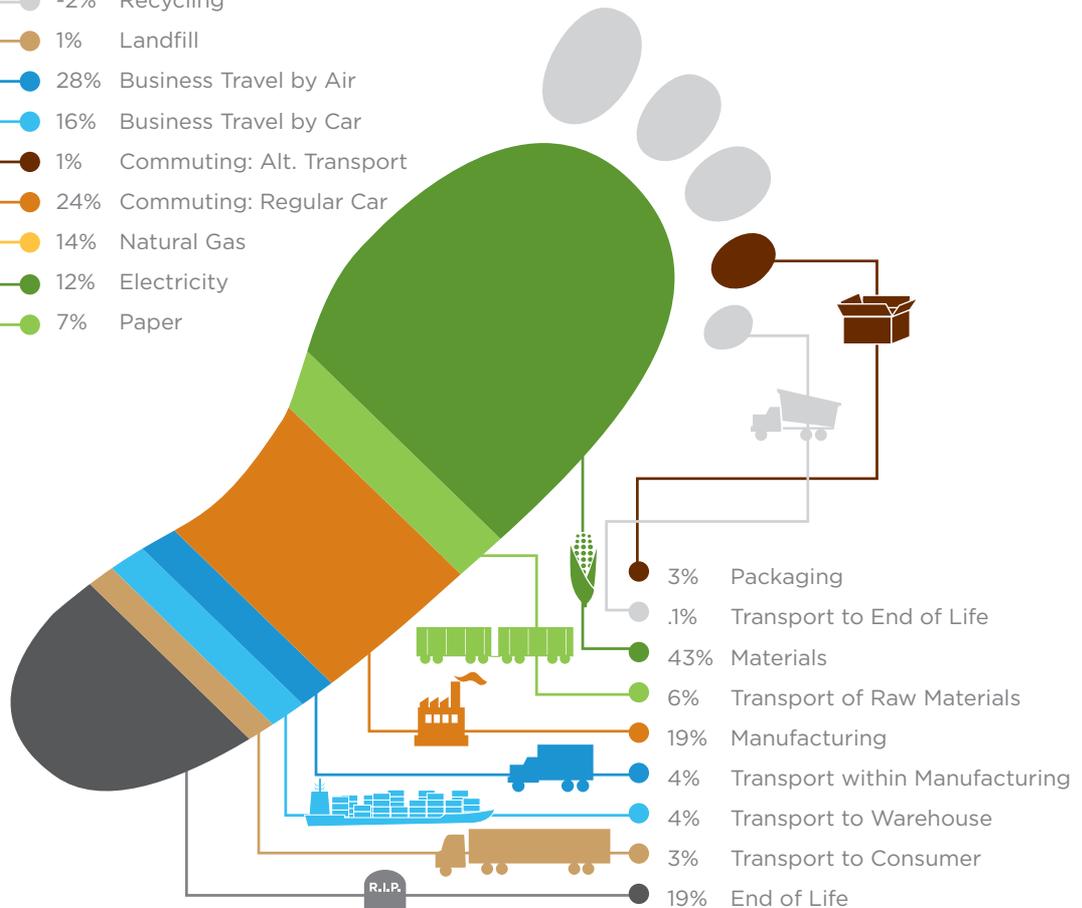

SUSTAINABILITY
REPORT
2015

We’re pleased to announce the completion of the second annual *Eco-Products Sustainability Report*. We spent a lot of time measuring our impacts, and setting goals to improve them. We look forward to sharing our ongoing journey with you.

Our Operations

The carbon impacts associated with our HQ building and all company travel and commuting.

Our Products

The carbon impacts associated with the manufacturing, transport and disposal of our products.

This is why green is all we do.™

We love this pale blue dot we call home.

We recognize that disposable products are not ideal, even if they do have environmental benefits. However, we live in a society where they are not going away anytime soon. From concerts to sporting events to take-out restaurants, single-use foodservice packaging is ingrained in our convenience-driven culture.

We don't think it makes sense to use our most valuable, non-renewable resource (oil) to make a product that is designed to be used for ten minutes, then get tossed aside. We think there has to be a better way.

We are not perfect, and our products are not perfect. But we are trying. Ultimately, we aim to get to a point where the use of our products is regenerative to the environment. Being less bad isn't good enough.
