Deli Sandwich Packaging

The Evolution of Deli Sandwich Packaging:

"Get 'er Done Era"

"Stack 'em Up Era"

"The Renaissance Era"

Flexible Plastic Wrap

- Bread may become soggy with excess moisture
- May limit the fresh appearance of ingredients
- Institutional appearance
- Limited branding potential

Rigid Plastic Packaging

- Visibility is often focused on bread
- No printable surface for branding or adding merchandising appeal
- Labels or brand stickers can limit visibility of ingredients
- Institutional appearance

DubView® ToGo! Deli Bags

- Promotes fresh, homemade appearance
- Side view visibility drives impulse sales
- Anti-fog film provides clear visibility in the hot or cold case
- Heat sealable for extended product shelf life
- Large printable paper surface for brand and merchandising appeal

Bag & Tray* Loading Instructions

1

Place sandwich onto tray

2

Slide sandwich and tray into bag

3

Close and seal bag

*Support tray offered with 300059, 300097, 300098, and 300099 only

Place sandwiches on display - you're ready to sell!

A Handmade Sandwich

Deserves an Artisan Package

300094 - Versatile Bag for Large Square & Round Sandwiches

300093 - Versatile Bag for Medium Square & Round Sandwiches

Our innovative DubView[®] design accommodates a wide variety of deli sandwiches

300097 - Versatile Bag with Support Tray for a Half Size: Sub, Square, Round, & Stacked Wedge

300098 - Full Size Bag with Support Tray for a 12" Sub

DublView® ToGo! Deli Bags

- Improve your fresh and homemade image
- Full-view visibility from the side drives impulse sales
- Perfect for the cold merchandising case

EcoCraft® ToGo! Hot Meal Packaging

Insulated Carryout Packaging: A Closer Look Into The Innovation

Balanced Ventilation

Breathable paper and vents offer a perfect balance of heat retention and moisture release, keeping food hot and crisp which drives repeat customers to your operation.

VERSUS

Sauna Effect

Plastic foam carryout containers often retain too much moisture, which keeps food soggy and unappetizing during transit.

Innovative Versatility

Item 300797 can fit two 11lb food trays or one 3lb food tray for different wing varieties in one easy-to-carry bag.

Fresh ToGo! Insulated Carryout Packaging

- Innovative insulating design keeps food hot longer than standard deli packaging
- Grease resistant, high barrier paper provides stain protection
- Significantly more sustainable than rigid plastic containers
- Fried foods stay crispy due to our high-performance ventilation and breathable paper
- Superior performance with or without a food tray

Deli Packaging Closure Instructions

SAFETY TIP REMINDER: Check shelf temperature with infrared gun for minimum 180°F.
PREPARATION AREA: Attach price sticker and open the bags. Place liners in trays and stack to save space for easy loading.

1 Remove from spit and rest at least 1 minute to retain heat. Use tongs to place chicken in the lined tray.

2 Load tray with the chicken into the bag at a 45° angle.

3 Window facing you, fold the top 1" of the bag and crease the fold.

4 Peel the tac seal sticker from the bag.

5 Fold the top 1" of the bag again to seal the bag closed.

6 Use vents to insert the thermometer for monitoring internal temperature.

7 Load The Warming Unit. **You're Ready To Sell!**

A Closer Look Into The Innovation:

Fogged visibility through plastic dome and blocked visibility from sleeves may reduce product-quality inspection, which can reduce impulse sales

Sauna effect causes food to continue cooking, resulting in less flavorful food due to hot juice and moisture pooling at the bottom of the base tray

(Beaker contains juice collected from the food tray after 4 hours in a heated merchandising case)

RIGID PLASTIC PACKAGING

Rigid Plastic Deli Packaging

- Fogged visibility through plastic dome and blocked visibility from sleeves may reduce impulse sales
- Takes up extra space in refrigerator when storing leftovers and in kitchen wastebasket when disposed
- Plastic dome lid and base tray must be sealed correctly to avoid messy spills during transit
- Requires carry sleeves or handles for safer portability
- Rigid plastic containers require extra space in storage and in transit

Rigid Plastic Versus Flexible Paper

Anti-fog film window
drives impulse sales
with superior visibility

Balanced ventilation
design allows moisture
release and heat retention

Breathable paper
packaging improves
the food's flavor and
juice retention
*(Beaker contains juice
collected from the food tray
after 4 hours in a heated
merchandising case)*

FLEXIBLE PAPER PACKAGING

ToGo! Hot Meal Deli Packaging

- Grab-and-go package design eliminates the extra cost of paperboard sleeves
- High-tech grease and moisture resistant paper provides superior stain protection
- Maintains safe food temperatures at the required hot case temperatures
- Rotisserie chicken applications require a food tray for support
- Significantly more sustainable than rigid plastic containers

ToGo! Foil Insulated Packaging

ToGo! Foil Insulator Bags

- Excellent heat and cold retention during transport
- Superior grease and moisture protection
- Cost-effective alternative to rigid paperboard and plastic containers

Natural Advantages of EcoCraft®

- Made with FDA food-grade, 100% unbleached, chlorine-free paper
- Packed in 100% recycled paperboard inner-carton and tray dispenser packaging to reduce raw-material waste
- Soy-blended dry wax on interfolded sheets reduce reliance on petroleum wax
- New dispenser carton and tray design includes printed facts and information about the sustainability benefits of EcoCraft®
- EcoCraft® products, on average, contain 20% pre-consumer waste fiber
- Multiple EcoCraft® products are third-party certified compostable
- Reduces your carbon footprint by purchasing form-fitting, “right size,” flexible packaging with high case counts and small case-cube size
- An experienced national network of sales representatives that can help advise your business on ways to improve your sustainable packaging design

We believe in the “Triple Bottom Line” approach of continuous improvement in sustainable packaging design:

Social Responsibility – good for the people

Ecological Responsibility – good for the planet

Economic Responsibility – affordable choices

With our EcoCraft® brand, we were the first company to offer a full stock line of unbleached, sustainable foodservice packaging in North America. We believe sustainability is an ongoing journey of continuous improvement and evolution. This approach propels us to constantly enhance our sustainable practices and products. **This commitment to affordability and innovation has allowed Bagcraft® to create the most recognized brand of sustainable flexible packaging available in the industry.**

*Environmental impact estimates were made using the Environmental Paper Network Paper Calculator Version 3.2. For more information visit www.papercalculator.org

Flexible Paper & Paperboard Trays

A Perfect Marriage

Flexible Paper & Paperboard Trays make the ultimate food packaging combination!

For best food packaging results, remember to add a paperboard food tray. We offer a wide range of sizes that fit the most demanding applications, including a specialty support tray for deli sandwiches. The high quality trays are coated with a moisture and grease resistant barrier for superior performance.

Our Fresh ToGo!® Insulated Deli Bag item 300797 can fit two 1lb food trays or one 3lb food tray for different wing varieties in one easy-to-carry bag.

Our DublView® ToGo Deli Bag items 300059, 300097, 300098, and 300099 are equipped with our natural paperboard tray for added support to the most demanding sandwich application!

Custom Converting & Printing Capabilities

Bagcraft® offers the broadest range of specialty bag, sheet and roll converting capabilities in the flexible foodservice packaging industry. We manufacture high-quality custom packages on 130 different production lines to provide a wide variety of custom package and print designs. With our efficient, superior F&K presses, we can deliver state-of-the-art graphics capabilities that help differentiate your products on the shelf and on the go. Our long-term commitment to innovation and practical solutions enables us to expertly consult with you on packaging design, process graphics and rigid packaging replacements.

Please review the information we need before you request a quote for a custom product

Provide the individual bag, sheet or roll size

- Bag (width, gusset, length)
- Sheet (width and length)
- Roll (roll width and length or outer diameter)

Initial order quantity needed and the annual volume (units or cases)

Name of printed design or logo

Basis weight of paper if known

Type of paper or combination of materials (foil, poly or glassine)

Need a film window?

- Provide an explanation of the proposed window die or panel location on the package

Number of printed colors (provide PMS numbers)

Product application (what will the package be used for?)

Case pack sizes

Shipping/distribution information

How to measure a bag for quotes and production:

- Measure the face of the bag (width)
- Measure the gusset of the bag (side width)
- Measure the length of the bag (not including lip)
