

Introducing Trendy,
Environmentally-Friendly Containers

- *Made from plants - not oil!*
- *Sustainable & Compostable*
- *Made in U.S.A.*
- *Attractive & Durable*

Introducing a U.S.-made, eco-friendly line of containers that comes from the earth, serves its purpose beautifully, and can return to the earth without a trace!

Our Sustainability Commitment

- A** Begins with an abundant natural raw material (ex. corn), that can easily and efficiently reproduced each year and doesn't deplete fossil fuels. Producing and using Ingeo™ resin means less greenhouse gases in the air.
- B** The material is put through a simple process to make plant sugars. The sugars are fermented in a process similar to making yogurt, and transformed to a high performing polymer called polylactide.
- C** This eco-friendly resin is converted into Innoware's ECO™ food containers.
- D** With the correct end-of-life handling and conditions, Innoware ECO™ containers compost in 60-180 days with no toxic residue.
- E** The compost can be used to grow more corn. Thus, the resource is renewed and the cycle continues.

Plastics from plants – not oil!

The ECO™ containers meet the needs of packaging today without compromising on the earth's ability to meet the needs of tomorrow.

 We use Ingeo™ plastics that is made from plants, not oil. This is our sustainability commitment.

The containers are ideal for cold applications such as salads, sandwiches, wraps, snacks, desserts, fruits and more. Our containers send the "Return-2-Nature" message that tells your customers that you run an environmentally responsible business.

The ECO™ containers meet the ASTM standards for compostability as certified by the Biodegradable Products Institute. This means that they biodegrade in a commercial compost facility completely within 60-180 days, without releasing any toxic residues. They are approved by Cedar Grove Composting, Inc. and this innovative line of packaging is also disposable with food waste – no separation is required.

Sustainable

- Made from plants - not oil!
- Annual renewable resource.
- Uses Ingeo™ plastics; less greenhouse gases added to the air.
- Made in the U.S.A.
- 100% compostable in 60-180 days within a commercial compost facility.

Versatile

- Two-piece & hinged products.
- Crystal clear lids or solid embossing lids available.
- Great for a variety of cold food applications.

Stylish Shape & Natural Color

- Natural color underscores eco-friendliness.
- Contemporary shape – sleek and appealing.
- Color compliments the look of salads, fresh fruit and more.

Lid Embossing

- Low custom embossing minimums.
- ECO™ logo embossed on solid lids at no cost – conveys an “earth-friendly” message.
- Solid and clear lids can be embossed with your logo/message.
- Builds brand and product recognition.

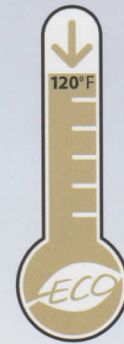

Durability

- Stronger and more durable than most compostable packaging on the market.
- Stackable containers add speed and safety to large take-out orders.

Transportation & Storage

- Combines dine-in & take-out containers to reduce inventory and preserve storage space.
- Secure stacking lids for easy handling and transport.
- Small cases are easy to handle.

NOT MICROWARMABLE
 SOLID LIDS & BASES
 up to 120°F.
 CLEAR LIDS
 up to 105°F.

AVOID HIGH TEMPERATURES
