Plastics from plants – not petroleum!

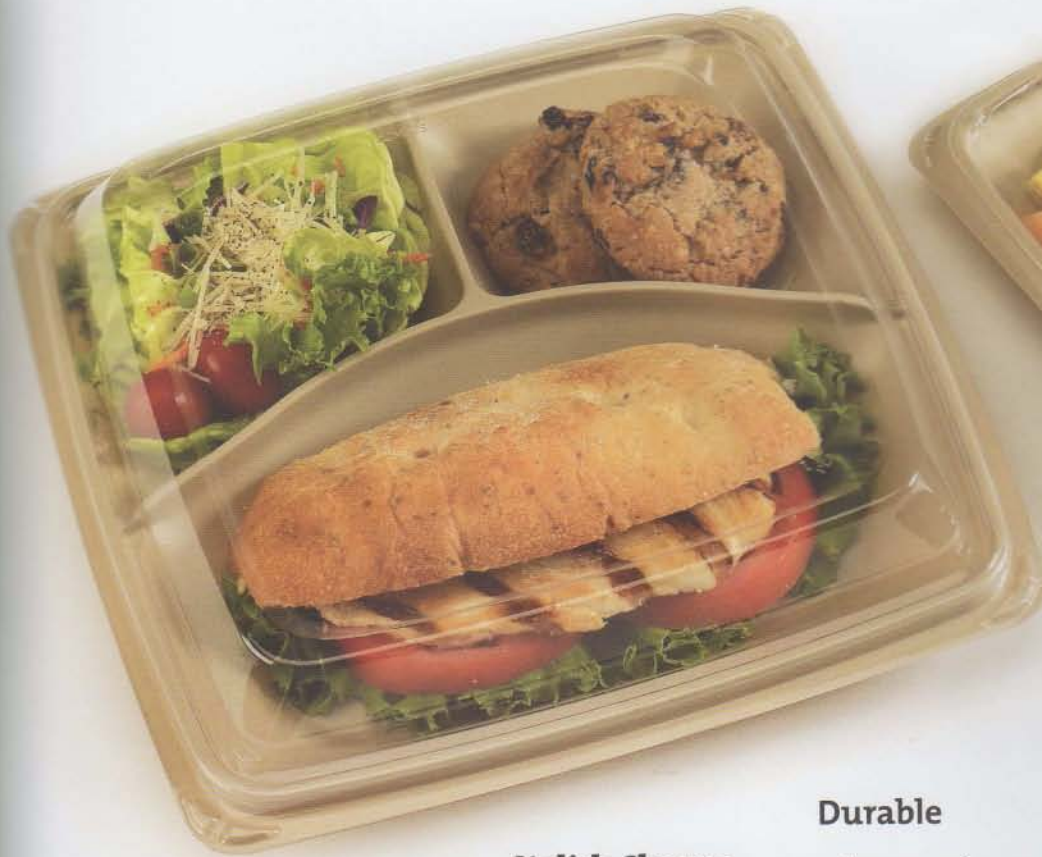

We use Ingeo™ plastics that are made from plants, not petroleum. ECO™ containers are ideal for cold applications such as salads, sandwiches, wraps, snacks, desserts, fruits and more.

ECO™ containers meet the ASTM standards for compostability as certified by the Biodegradable Products Institute. They biodegrade in a commercial compost facility within 60-180 days without releasing any toxic residues. Approved by Cedar Grove Composting, Inc., this innovative line of packaging is disposable with food waste – no separation is required!
