SPRING 2020

A new decade is a time when people are motivated to take stock, reflect on the past, and envision their future, and we're no different. We know the ways of the past are not the ways of the future, and we make it our mission to be on the front lines of change. Here are some of the goals we're tackling as we take on 2020 and beyond:

- ✓ Improving our customers' sustainability commitment through packaging that's undoubtedly green
- ✓ Strengthening customers' brands through custom packaging and marketing resources
- ✓ Expanding how customers can dispose of stuff they used to only think of as "trash"
- ✓ Tracking advancements in environmental legislation as a growing list of states and municipalities take action
- ✓ Increasing Zero Waste knowledge and operations through training and education
- ✓ Growing our team of Operator Specialists to help foodservice operators accelerate their sustainability efforts
- ✓ Advocating for more composting infrastructure and collaborating with industry groups to make it happen

Sure, change can be hard. We are human, after all. However, change is necessary for progress. We have to be willing to let go of the status quo and strive for something different if we want a better future. At Eco-Products®, this is what motivates us. We live and breathe change every day.

When you hear about sustainability or Zero Waste, you might feel intimidated, confused, or overwhelmed. Fear not. We love this stuff. We can help you through it. From packaging choices, to marketing support, to sustainability expertise...

We Got This. And so do you.

\*Shoutout to Dig It for the photo

# VISION ..... ECO-PRODUCTS® WILL BE IN THE VANGUARD OF OUR ZERO WASTE FUTURE

\*Shoutout to Cornerstone Ranch Gardens for this photo

# MISSION

WE UNDERSTAND THE  
CONNECTION BETWEEN  
THE HEALTH OF THE PLANET  
AND THE IMPACTS OF  
DISPOSABLE PACKAGING.

EVERY DAY WE WORK TO  
ADVANCE ZERO WASTE SYSTEMS,  
AND HELP OUR CUSTOMERS  
BE BETTER STEWARDS OF  
THE ENVIRONMENT.

## Vanguard™ Molded Fiber

In April 2019, we announced a groundbreaking new line of molded fiber plates and containers. This new line – called Vanguard™ – demonstrates our continued leadership and innovation in foodservice packaging. The Vanguard™ line uses proprietary alternative compounds to achieve grease-resistance performance, without relying on conventional PFAS\*. The initial line, available in a limited release, includes a 10-inch round plate, a three-compartment 10-inch plate, a 9-inch single-compartment clamshell and a three-compartment 9-inch clamshell. A select group of customers is currently testing the initial run. More products will be added soon, including bowls and other sizes of plates and clamshells.

- » Made from sugarcane
- » Microwaveable and freezable
- » Hot & cold food friendly
- » Grease- & cut-resistant
- » Proprietary alternative compounds to achieve grease-resistance performance
- » Meets BPI's requirements for compostability certification effective on January 1, 2020
- » Patents pending on the new formula
- » The initial line is in use with select customers, with more shapes and sizes to be coming soon

\* Per- and polyfluoroalkyl substances

## Cutlerease™ Dispensing System

### Clean, Hygienic Cutlery

- » Cutlerease innovative design dispenses clean cutlery one piece at a time.
- » Tape tabs offer easy pick up and loading of cutlery into cartridge without having to touch any part of the cutlery.
- » Handle-first delivery ensures guests touch only the handle of the cutlery they are taking.
- » No trays or levers; helps prevent accumulation and transfer of germs and bacteria.

### Space Savings

- » Compact footprint: <math>< 1 \text{ ft}^2</math> for 3:1 space savings over the other guys.

### Efficient Dispensing

- » Customers can take only what is needed.
- » Cutlerease design automatically dispenses one piece of cutlery at a time.
- » Guests simply pull on the handle of the piece they want, and the next piece pops out ready for the next person.

### Convenient & Easy to Use

- » Customize your cutlery options. Cutlerease is so versatile, you can mix and match cutlery to meet the needs of your business. Need more spoons than forks? No problem.

### Zero Waste Programs

- » Eco-Products Cutlerease cutlery is BPI certified compostable, so it's compatible with Zero Waste Systems.

We're the most recognized and authentic brand in sustainable foodservice packaging. As category leaders, we're able to deliver expertise, benefits, and services that are unavailable anywhere else on the market. **We Got This.**

## BUNDLE

- ✓ A one-stop shop assortment with 400+ SKUs
- ✓ Two product lines offer choice of environmental benefits
- ✓ Third-party certifications back up our environmental claims

BUNDLE

## CUSTOMIZATION

- ✓ Custom printing
- ✓ Custom embossing
- ✓ Custom product development

CUSTOMIZATION

## ADVOCACY

- ✓ Thought leaders of Zero Waste systems
- ✓ Driving expanded access to composting infrastructure
- ✓ Dedicated sustainability expert on staff

ADVOCACY

## SERVICES

“Included in the Box”

- ✓ Marketing and communications services
- ✓ Custom life-cycle assessment reports
- ✓ Zero Waste consulting

SERVICES

# BUNDLE:

We're big fans of a systems approach to waste diversion featuring a comprehensive line of consistently branded disposables. We make 400+ SKUs, and we're continually developing new products to serve everything from apple fritters to zucchini tots.

## Our Two Product Lines

### GreenStripe®— Made with Renewable Resources

RENEWABLE  
RESOURCES

- Made from renewable plant materials that can be grown again and again.
- The vast majority of GreenStripe products are compliant with ASTM standards for compostability and many are BPI-certified compostable, which means they can return to soil and help plants grow.
- Not made from non-renewable oil or gas like traditional plastics.
- Not suitable for backyard composting. These products need the high heat and careful management of a commercial pile to break down. Commercial facilities may not exist in your area.
- Paper and sugarcane products can go in the freezer, but they are not airtight. Freshness and freezer burn can become issues if left there for too long. PLA can become brittle when frozen, so we don't recommend putting these products in the freezer.

### BlueStripe®— Made with Post-Consumer Recycled Content

POST-CONSUMER  
RECYCLED CONTENT

- Made from post-consumer recycled materials that have been used, recycled, and repurposed, meaning fewer virgin resources are required and less landfill waste is created.
- Making new products from recycled materials helps drive recycling markets and infrastructure.
- Plastic can become brittle when frozen, so we don't recommend putting these products in the freezer.
- BlueStripe® products incorporate the highest amount of post-consumer recycled material available without compromising performance.
- BlueStripe® plastic products can't be recycled in many communities, but check with yours to find out what they'll accept.

\*PSM Cutlery is made with 70% renewable resources, but it is NOT compostable.

Material type	What it is	Why we use it	What we use it for
 PLA	<ul style="list-style-type: none"> <li>• Polylactic acid</li> <li>• Plastic made from starchy plants like corn or sugar</li> </ul>	<ul style="list-style-type: none"> <li>• Looks and feels like traditional plastic, but is compostable in commercial composting facilities</li> <li>• Want a plastic cup without the petroleum? Here it is.</li> </ul>	<ul style="list-style-type: none"> <li>• Cold Cups</li> <li>• Lining for Hot Cups &amp; Paper Food Containers</li> <li>• Lids</li> <li>• Cutlery</li> <li>• Clear Containers</li> </ul>
 SUGARCANE	<ul style="list-style-type: none"> <li>• Also known as bagasse</li> <li>• Made from the stalk left over after the cane juice is extracted to make sugar</li> </ul>	<ul style="list-style-type: none"> <li>• Renewable and fast growing</li> <li>• Bagasse fiber is a byproduct that would otherwise be discarded or burned</li> <li>• Compostable in commercial facilities</li> </ul>	<ul style="list-style-type: none"> <li>• Plates</li> <li>• Bowls</li> <li>• Containers</li> <li>• Trays</li> </ul>

# Renewable & Compostable Hot Cups

The Earth is amazing, and as far as we know, we only get one planet. So let's celebrate with a cup that's as special as Earth itself. The World Art™ Hot Cup pays tribute the planet. It's BPI-certified compostable and returns to the Earth as perfectly as it holds drinks. Best of all, when the morning rush is over, its work has really just begun — with every Eco-Product, comes a whole force for good. We have your trash on our mind, and will do everything we can to ensure these cups and all of our other compostable disposables return to the soil as effortlessly as they serve your patrons. Don't have a commercial composter in your community yet? You can still feel good knowing these products are made with renewable resources. So raise a cup to this cup's environmental attributes.

- » Made with renewable resources
- » Lined with PLA, a plant-based plastic
- » Meet ASTM D6868 standards for compostability
- » BPI-certified compostable

## GreenStripe® Cold Cups

This is not your (virgin plastic, non-compostable, non-recyclable) red party cup. This is the one and only GreenStripe® renewable and compostable Cold Cup! This cup holds drinks without leaking, rocks its environmental attributes, and is always the life of the party. Best of all, when it's time to go home, this cup is 100% certified compostable and returns to the soil...until your next bash.

- » Available in nine sizes
- » Dome, flat, and sip lids
- » Made with renewable resources
- » Made with PLA, a plant-based plastic
- » Meet ASTM D6400 standards for compostability
- » BPI-certified compostable
- » Alternate prints available

## BlueStripe® Cold Cups

We're pleased as punch to announce that we've upped the recycled content in our BlueStripe® cold cups! Our sleek new BlueStripe® design graces our 30% RPET cups that are rolling out. Recycled products like these help save resources, keep waste out of landfills, and give you a more sustainable cold cup choice.

- » Available in five sizes: 9, 12, 16, 20, and 24oz
- » Flat lids

## PLA & Paper Straws

Need straws? We got 'em! We offer all kinds of options for lengths, diameters, and wrappers. Our PLA and Paper Straws are compliant with many straw bans around the U.S. Not sure what's allowed in your area? We stay on top of legislation like that, so we can help you find the info. Reach out to your Sales Rep or Operator Specialist to discuss.

- » Made with PLA, a plant-based plastic, or paper
- » PLA straws meet ASTM D6400 standards for compostability and are BPI-certified compostable

# Clear Grab & Go Containers

Life is all about choices, and isn't it a wonderful feeling to stand in front of a display case of beautifully arranged food in colorful stacks to choose what to eat for lunch? Say no to the waste that comes with old-school containers and reach for something different. Fill your fridge with these attractive and environmentally preferable clear containers. Your customers will grab, go, and even better, come back again for seconds. They're clearly a better choice.

## WorldView™

Our WorldView™ Containers combine sugarcane bases with RPET or PLA lids for maximum strength and optimum presentation. Renewable and compostable PLA lids are perfect for cold foods, while the 100% recycled content lids work equally well for hot or cold dishes.

- » Available in a variety of shapes and sizes
- » Bases made with renewable and reclaimed sugarcane fiber
- » Lids made with PLA or 100% post-consumer RPET
- » Bases and PLA lids meet ASTM standards for compostability
- » Bases and RPET lids are hot-food friendly

## WorldView™ Naturals

It's a whole new world...view. Our most popular WorldView™ shapes are now available in a natural bagasse color. We're continually adding to this offering as any of our WorldView™ shapes has the potential to be produced in the natural bagasse color. We also offer embossing on all shapes and sizes. See page 36 for lead times and minimums.

## Sugarcane Bowls

Just say yes to sugarcane! Also known as bagasse, this reclaimed fiber is strong, sturdy, renewable and compostable. A multitude of sizes and shapes make our bowls suited for the tiniest side portion to an individual serving, all the way up to a family style entrée.

- » Made with renewable and reclaimed sugarcane fiber
- » Three shapes and many sizes to choose from
- » Select sizes available in white or natural color
- » Meet ASTM D6868 standards for compostability
- » For use with hot or cold foods
- » Grease- and cut-resistant
- » Microwaveable and freezable

### Dahlia™ Plates & Bowls

We make this dinnerware with a premium blend of bagasse and bamboo for a unique and undeniably green look. We've designed these plates and bowls in our signature leaf shape for that extra special touch.

- » Made with renewable resources — bamboo and reclaimed bagasse fiber
- » Meet ASTM D6868 standards for compostability
- » For use with hot or cold foods
- » Grease- and cut-resistant
- » Microwaveable and freezeable

∞ EP-PBS9 // ∞ EP-PBS6  
∞ EP-BLBS12

### Black Plates

These plates offer rigidity and an upscale look as well as the environmental benefits you've come to expect from Eco-Products. Pair with our matching black Vine™ cutlery for a winning combination (see page 30).

- » Meet ASTM D6400 standards for compostability
- » For use with hot or cold foods
- » Freezeable

# Folia™ Sugarcane Containers

The patented Folia™ line was designed to completely redefine the take-out and leftover experience. Innovative features include tear-away flaps for easier access to food, leak-resistant side flaps that prevent spills and hold condiments and cutlery, and a full array of shapes and sizes that satisfy a broad scope of foodservice needs. It's also the recipient of the "2013 Package of the Year" award from QSR Magazine and the Foodservice Packaging Institute, as well as the "iF Packaging Design Award 2014 - Gold."

- » Made with renewable and reclaimed sugarcane fiber
- » Meet ASTM D6868 standards for compostability
- » For use with hot or cold foods
- » Microwaveable and freezable
- » Embossed to show off handy features like pull tabs, perforated flaps, cutlery nooks, and sauce caddies
- » Molded, spill-resistant corner flaps
- » Engineered stackability

## Paper Food Trays

Paper Food Trays are the ultimate workhorse of the concessions world. Whether you're tossing up some chili fries or dishing out your signature nachos, there's a size to handle it. Resilient to grease and cuts, and freezer safe, these trays will keep food junkies happy.

- » Four sizes
- » Made with renewable resources
- » Customizable (See page 36)

## Plantware® Cutlery

What's white and black and green all over? Our Plantware® cutlery, of course! With undeniable environmental benefits and a rainbow of colors to choose from, this cutlery is a no-brainer choice for waste diversion. Match your decor, season, team colors or party theme without sacrificing sustainability.

- » Made with renewable resources
- » Made with PLA, a plant-based plastic
- » Meets ASTM D6400 standards for compostability
- » BPI-certified compostable
- » Crystallized for high heat tolerance (220°)
- » Cutlery wrappers are also compostable!

## Vine™ Cutlery

Our latest addition to the utensil party offers the same environmental benefits as Plantware®, but in a full size with classic styling. Pair with our Compostable Black Plates (page 25) for a formal, yet environmentally conscious, place setting.

- » Made with renewable resources
- » Made with PLA, a plant-based plastic
- » Meets ASTM D6400 standards for compostability,
- » BPI-certified compostable
- » Full 7in size and classic handle styling
- » Spoon is crystallized for higher heat tolerance (185°)
- » Napkin ring on cutlery kit is not compostable

## PSM Cutlery

PSM Cutlery (formerly known as Plant Starch Cutlery) is excellent for hot foods with a heat tolerance up to 200° F. Reinforced handles provide extra strength and stability.

**Please note: PSM Cutlery is not compostable.**

- » Made from a mix of renewable resources and fillers, like polypropylene, for strength and heat tolerance
- » A good choice for areas where composting is not yet available.

## 100% Recycled Cutlery

Our 100% Post-Consumer Recycled Content Cutlery is the first of its kind made from 100% post-consumer recycled polystyrene. Compared to traditional single-use cutlery that is made from virgin plastic, this recycled content cutlery diverts plastic from landfills at beginning-of-life.

» Performs just like a traditional plastic cutlery, while using no virgin petroleum

♻️ EP-S113 // ♻️ EP-S112 // ♻️ EP-S111 // ♻️ EP-S114

## Regalia™ Cateringware

Ready to party? We are! You can't beat the convenience of drop-off catering, especially when it involves guilt-free single-use servingware. Mix and match our half pans with one, two, or four compartments to serve a whole smörgåsbord of hot and cold foods. Pack it up, drop it off, and then be done.

- » Available in three compartment configurations with a common lid
- » Made with renewable and reclaimed sugarcane fiber
- » Meets ASTM D6868 standards for compostability

# CUSTOMIZATION:

You've carefully created a menu, chosen colors, crafted your logo, picked chairs and tables and lighting and paint. Your packaging deserves the same level of attention.

## Print & Emboss

Your food isn't generic, so why should your packaging be? You don't have to use off-the-shelf products that just anyone can use — you can build your brand with custom prints and embossing. With more than 100 customizable products, you can set yourself apart with a customized packaging suite. See page 36 for minimums and lead times.

CUSTOMIZATION

With more than 100 customizable SKUs, every piece of your packaging can be a brand touchpoint, contributing to your customers' overall experience.

# Custom Product Development

Ready to go beyond simple custom prints and emboss? Custom shapes can fulfill your custom packaging and branding needs in ways that even print and emboss just can't. Our experienced design team can help you create a tailor-made product to serve your food with flair without sacrificing functionality.

Larkspot's two-piece burger box does double duty: the base works alone for in-store dining, while adding the lid turns the package into a to-go container.

## 1. Let's Talk

We will meet with you to better understand your goals and discover how we can develop a custom product that meets your business needs.

## 2. Let's Collaborate

A designer will hand draw some possible solutions, get your input, and revise as necessary.

## 3. Let's See

Working off the sketches, our designer will create a dimensionally accurate digital model.

## 4. Let's Get Real

Using the computer renderings, we'll create a physical model using rapid prototyping technology to provide a real-life example of shape, size, and user experience.

## 5. Let's Give it a Go

Once the initial design is perfected, we'll create functional samples of your product out of the actual materials. At this stage, we'll test for things like strength, lid-fit, and leak resistance.

## 6. Let's Wow 'Em

Once approved, we will begin production and deliver a custom package that helps you build your brand and satisfy your customers.

## CMYK Color (aka "Full Color" or "4-Color Process")

If the art has gradients, blends, shadows, etc., or if it is made up of many colors like a photo, CMYK is the way to go. Cyan, Magenta, Yellow, and Black ink can be combined in different amounts to achieve millions of colors. This is the default method for our paper products because the minimums are lower and it is faster and less expensive.

## Spot Color

If the cup design has just a few solid colors, using spot color is the simplest way to go. Colors match better because the vendors use a specific color of ink rather than blending inks to build the colors. This is the only option when printing on our sugarcane or clear PLA products.

# Custom Emboss

Lead times and plate charges are subject to change. Find the most up-to-date information at [ecoproducts.com/custom](http://ecoproducts.com/custom)

Clear Containers & Lids	Sizes	Tool Type	Order Minimum	Lead Time*	Tool Charge

## Emboss

Embossed designs appear raised from their surroundings like George Washington's head on a quarter.

Side view: design is raised

\*Lead times start when the art proof and production proof are approved and P.O. is placed.

\*\*Any custom-embossed WorldView™ item can be produced in White or Natural, even if we do not currently stock it in Natural.

# ADVOCACY:

We could just sell cups and call it a day, but at Eco-Products®, we're committed to a Zero Waste future — this is truly what drives us. We strive to lead our industry to become one that solves problems instead of creating them.

## Using Business as a Force for Good

Eco-Products® officially became a certified B Corp in July 2016, and we were recertified in early 2019. If you're not familiar with B Corp, think of it as a sustainability certification for businesses, similar to what organic certification is for milk, or what Fair Trade certification is for coffee. Companies who are certified B Corps have been verified by the nonprofit organization B Lab to meet the highest standards of social and environmental performance, transparency, and accountability. This puts Eco-Products alongside some of the most respected sustainability-minded brands such as Patagonia®, Ben & Jerry's®, Seventh Generation®, and Etsy® - just to name a few. You can find out more about B Corp by checking out its website <https://www.bcorporation.net/>.

## Memberships & Partnerships

We know we can only do so much as one company, even if we're working our tails off. That's why we're active in a number of industry groups. Collaboration = bigger impact.

	<p>The US Composting Council advances compost manufacturing, compost utilization, and organics recycling to benefit its members, society, and the environment.</p>	<p>Our leadership team is represented on the board of USCC and as president of the board of BPI.</p>
	<p>The Biodegradable Products Institute (BPI) is a nonprofit association of key individuals and groups from government, industry, and academia. Through its innovative compostable label program, BPI educates manufacturers, legislators, and consumers about the importance of scientifically based standards for compostable materials that biodegrade in large composting facilities.</p>	
	<p>We are a founding partner of the Green Sports Alliance. The GSA leverages the cultural and market influence of sports to promote healthy, sustainable communities where people live and play. The Alliance inspires professional sports leagues, college conferences, sports governing bodies, colleges, teams, venues, their partners, and millions of fans to embrace renewable energy, healthy food, recycling, water efficiency, safer chemicals, and other environmentally preferable practices.</p>	
	<p>The Sustainable Packaging Coalition® (SPC) is an industry working group dedicated to a more robust environmental vision for packaging. Through strong member support, an informed and science-based approach, supply chain collaborations, and continuous outreach, they endeavor to build packaging systems that encourage economic prosperity and a sustainable flow of materials.</p>	
	<p>Established in 1933, the Foodservice Packaging Institute is the trade association for the foodservice packaging industry in North America. FPI's members include raw material and machinery suppliers, packaging converters, foodservice distributors, and operators/retailers.</p>	
	<p>Colorado Recycles is the leading independent, nonprofit organization in Colorado that is actively working to promote and encourage recycling through programs that educate the public, local governments, businesses, and Colorado's elected officials. Its programs are designed to provide technical assistance to those wishing to recycle and compost.</p>	
	<p>The Compost Manufacturing Alliance LLC (CMA) is a privately owned operational research and testing group consisting of major industrial composting facilities across the U.S. CMA works with compostable product manufacturers to field test compostable products under real world conditions across multiple processing technologies.</p>	

# Third Parties are Validating our System Solutions Approach

We have long believed in and advocated for the role compostable packaging can play in diverting food scraps from landfills. With compostable packaging, the concert goer, baseball fan, or restaurant customer doesn't have to sort their uneaten sandwich crust from their plate. Putting everything in one bin makes life easier for them...and the composter. Recently, a number of reports have highlighted the benefit that composting and compostable packaging can have in waste diversion.

“As a commercial composter, I have confidence in servicing events and venues that have partnered with Eco-Products. Their full commitment to Zero Waste means I get more food scraps with minimal contamination - and that helps my business. As an example, because Farm Aid 2016 partnered with Eco-Products, I got 121% more food scraps and only 2% contamination. Eco-Products is doing it right.”

- Justen Garrity  
Founder & President  
Veteran Compost

**The Ellen MacArthur Foundation New Plastics Economy** vision for a more sustainable approach to plastics includes compostable packaging for food contact applications.

<https://newplasticseconomy.org/report-2017>

**BioCycle** published an article that quantified food scraps diverted through the use of compostable packaging. Composters got 72% more food when operators used compostable foodservice packaging.

<https://www.biocycle.net/2016/08/15/compostable-products-postconsumer-food-scraps/>

According to the **SPC's "The Value of Compostable Packaging"** report, by using compostable packaging at Farm Aid 2016, the festival organizers:

1. Kept more than 19,000 pounds of food out of the landfill.
2. Prevented the release of more than 14,000 pounds of CO<sub>2</sub> from being released into the atmosphere.
3. Increased food scraps collection by an incredible 122%!

<http://greenblue.org/work/value-of-compostable-packaging/>

**ReFED** identified commercial composting as the solution with the greatest potential for keeping food scraps out of landfills.

<http://www.refed.com>

# SERVICES:

All of our services are “Included in the Box.” In other words: complimentary. Gratis. On the house. No strings attached. If you are an Eco-Products customer, we’d love to help you spread the word about your sustainability mission.

## Marketing Support

### Stock Pieces

Stock posters, table tents and window clings are available to order (free of charge).

### Personalized Pieces

Add a logo to personalize our posters, signs, table tents, stickers, digital displays etc.

### Custom Pieces

We can start from scratch to match a particular look and feel or design to a spec.

### Videos

Our case studies aren't just for our benefit. Our operators can use them to spread their story, too.

[youtube.com/user/greenisallwedo](https://youtube.com/user/greenisallwedo)

### Employee Training

We can create back-of-house signs, presentations or even videos to help train staff about our products and proper disposal.

### Life Cycle Analysis

We calculate our carbon footprint, so we can use that data to create a customized carbon footprint for our customers.

### Custom Prints & Emboss

Why not communicate right on the products themselves? We have more than 120 items prime for customization. See page 36 for details.

### Custom Shapes

For an extra special package, our product design team can create something unique and functional to fulfill a specific need when stock just doesn't cut it.

### Stock/Order Guides

Essentially a catalog with a custom product assortment, these guides can help operators with multiple locations know what's available to them.

### Custom Compostable Labels

Many stickers and labels are made with plastic and adhesives that are not compostable. These labels meet ASTM standards for compostability and can help identify your packaging as compostable, which is crucial for composters who can't process conventional packaging at their facility. We can source stickers to satisfy all your labeling needs without sacrificing the environmental benefits of your packaging. Use our designs or customize your own. Ask your Sales Rep or Operator Specialist for details.

# 2019 Sustainability Report Summary

## 2018 was a year of growth and opportunity for a Zero Waste future.

Our march toward our vision of a Zero Waste future continued in 2018. From our partnership with Vail Resorts, which will leverage the combined power of our product bundle and marketing and sustainability services, to expanding our Operator Specialist team from two to four, to being an ideal partner to operators seeking to comply with legislation, or consumer demand driving our category, we stay committed to being in the vanguard of our Zero Waste future.

### Key highlights:

- Our national Operator Specialist team is a talented group that is helping customers of all shapes and sizes reach their Zero Waste goals.
- Our Zero Waste toolkit - The Roadmap

to Zero - is a culmination of years of experience and knowledge to help large multiunit foodservice operators on their journey to Zero Waste.

- We are proud to be recertified as a B Corp!
- We solidified our position as the partner of choice for environmentally preferable foodservice packaging and Zero Waste support, particularly for operators setting sustainable packaging goals or working to comply with legislation.
- As we continue to work tirelessly with our partners on this path to Zero Waste, we remain as motivated and dedicated as ever!

We'd love to hear your feedback! Email us with your comments or questions at [sustainabilitymaven@ecoproducts.com](mailto:sustainabilitymaven@ecoproducts.com).

### Our Operations

The carbon impacts associated with our HQ building and all company travel and commuting.

### Our Products

The carbon impacts associated with the manufacturing, transport and disposal of our products.

As you can see in the graph to the right, our operations contribute very little to our overall carbon footprint. We made the footprint graphs above equal in size so you can clearly read the data, but really our products are responsible for most of our carbon emissions by far. If the feet were to scale, it would look more like this:

### Eco-Products Carbon Emissions

Metric Tons CO<sub>2</sub>E

## 2018 Highlights

Converted nine operators to front-of-house composting programs

Continued to lead workgroups with industry leaders to advance composting infrastructure

Hired two new Operator Specialists; one in the Northwest and one in the Southeast

Updated the required percentage of post-consumer plastic in our BlueStripe® cold cups from 25% to 30% Post-Consumer Recycled Content PET

24.7% Decrease in miles flown per \$1,000 of sales

64% Employees who took advantage of their paid day to volunteer (up from 60% in 2016)

Our complete Sustainability Report can be found at [ecoproducts.com](http://ecoproducts.com)

8th Street Market is a community-focused food hub, where a spirit of creativity meets entrepreneurship, growing a group of tenants that serve one another as well as the community. Currently, the market has nine diverse merchants including a brewery, a farmers market, and a culinary school.

By supporting small and midsize local farmers, 8th Street Market gives back in more ways than one, pairing culinary excellence and experiences to feed a cycle of growth for the area’s agricultural producers and food entrepreneurs.

Food Loops is picking up food scraps from all merchants, and is selling and picking up compostable packaging from 80% of the merchants. They are able to utilize Eco-Products’ broad compostable bundle to provide a one-stop shop for the merchants regarding their packaging needs.
