

PATENT PENDING TECHNOLOGY

THE MARINE BIODEGRADABLE  
**STRAW**  
*that dependably serves  
then fades away*

*Polyhydroxyalkanoate:* it's a long word for a product with a short life span. In brief, it's called PHA and it's transforming the narrative around disposable plastics.

New Phade™ straws are made with PHA, a material that biodegrades in marine and soil environments. It's the first of its kind in the U.S., and you can be among the first to offer them—and show your customers you're committed to making better choices for the planet.

PLEASE DISPOSE  
OF USED STRAWS  
RESPONSIBLY

MARINE  
BIODEGRADABLE

SOIL  
BIODEGRADABLE

HOME & INDUSTRIAL  
COMPOSTABLE
