

WORLDVIEW™ ROUND & OVAL BASES

CLEARLY
a better choice.

Expect more and sacrifice nothing

Here's some food for thought: polystyrene to-go containers are made from precious oil and usually end up in landfills. **WorldView™** separates from Eco-Products® are strong, grease and cut resistant alternatives to traditional plastics. With renewable, ASTM compliant for compostability round and oval bases, and recycled content lids, these sets can handle any cold or hot, saucy, creamy, buttery dish you can throw at them.
